

ZOLL®

Arrhythmia Management System

Next-Generation
Cardiac Monitoring Services

MCT + Biometrics

ZOLL® expands our offerings in cardiac care with our next-generation Arrhythmia Management System (AMS) – advanced Mobile Cardiac Telemetry with Biometrics.

Streamlined patient management with ZOLL Patient Management Network

- Unified online portal for LifeVest and Cardiac Diagnostics patients—review all patients with a single login
- View all patient alerts and reports from a single online dashboard

Comprehensive patient support

- ZOLL customer service calls every new patient to ensure smooth setup of the monitoring device
- 24/7 patient support for monitoring questions and troubleshooting, so you can focus on patient care

High quality billing standards

- The highest standards in direct Medicare billing and third-party billing
- Dedicated, expert reimbursement team with decades of billing experience

Patient Name: **Patterson, Walter**
 Date of Birth: 1942-06-04
 Device Type: Cardiac Event Monitor

ZOLL Arrhythmia Management System (AMS)

- FDA-cleared device that is intended to continuously record, store, and transmit up to 30 days of data including ECG, Heart Rate, Respiration Rate, Activity, and Posture
- Single Channel high-resolution ECG
- ZOLL Arrhythmia Management System (AMS) is a next-generation cardiac monitoring device that combines patient biometric data with traditional mobile cardiac telemetry (MCT) and has been proven to increase diagnostic yield by adding context to improve patient management decisions

Online Ordering— ZOLL Patient Management Network

- Place orders and review reports for LifeVest and Cardiac Diagnostics on a single patient dashboard
- Once submitted, Medical Orders are transmitted directly to ZOLL for processing

Physician-Guided Reports

- Designed in partnership with physicians to facilitate quick review of monitoring results and consistent identification of critical data—posted promptly to ZOLL Patient Management Network
- Daily, Event, and End-of-Use reports enable trend analysis, like A-Fib burden, heart rate, respiration rate, activity and posture
